Forecast for Tuesday 18 Apr 2023

Weather: Widespread low cloud or fog affecting mainly central and eastern hills during the morning, giving a very slight chance of some drizzle first thing. Low cloud lifting and clearing in the hours after dawn to leave a dry and largely sunny day, but with a strengthening easterly breeze. Remaining dry into the evening, some patchy cloud perhaps on high summits by very late evening.

Chance of cloud-free hill tops above 600m: 30% in the east, 60% in the west at first. Increasing to greater than 95% everywhere from late morning. 60% in the east by very late evening.

Low cloud and visibility: Extensive low cloud or fog banks covering central and eastern hills in particular early morning (bases generally 300-500m), but higher peaks perhaps just above the cloud. Periods of cloud with bases 300-500m in the east of the park by very late evening. Very good visibility outside of cloud, with a slight haze.

Meteorologist's View

Low cloud especially covering central and eastern slopes may make for difficult navigation during any early ascents until mid-late morning, when cloud is expected to lift and clear. Despite the strong sunshine (sunscreen required) the strength of the wind will make 'feels like' temperatures around freezing for much of the day on the highest ground in the park. The 'wind chill' effect worsens through the evening. With strengthening winds there will be widespread buffeting on higher areas as well as exposed ridges.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Forecast for Wednesday 19 Apr 2023

Weather: Becoming mostly cloudy overnight, but remaining dry. Largely cloudy during the morning with a slight chance of a few spots of rain, then dry with increasing amounts of sunshine by the afternoon. Very blustery with a significant wind chill.

Maximum wind: Easterly 30-35mph, with gusts 45-50mph possible on major summits and some downslope valleys.

Chance of cloud-free hill tops above 600m: 30% in the morning in central and eastern areas, 70% in the west, increasing to greater than 95% everywhere by the afternoon.

Low cloud and visibility: Widespread low cloud affecting mainly central and eastern slopes in the morning, with bases varying 300-500m. Cloud lifting clear of summits by late morning and tending to thin and break up into the afternoon.

Temperature: **Valleys:** Plus 3 Celsius increasing Plus 11 Celsius.
At 600m: Plus 3 Celsius increasing Plus 8 Celsius.
Freezing level: Above summits.
